Techstars Accelerator Application // Quantitative Fintech

# The Autonomous Intelligence Terminal for Institutional-Grade Execution

Democratizing hedge-fund microstructure algorithms, 5-layer multi-timeframe alignment, and real-time liquidity protection for 50 million active traders worldwide.

FOUNDER & SYSTEMS ARCHITECT
**Suneel Pirkash**

TERMINAL DEPLOYMENT
**goldterminal.io (Live Web App)**

QUANTITATIVE MOAT
**480,717 Bar Empirical Backtest (p < 0.01)**

ACCELERATORS TARGETED
**Techstars / Y Combinator**

TradingPoint Technologies Inc. © 2026

STRICTLY CONFIDENTIAL • FOR INVESTMENT COMMITTEE REVIEW ONLY

# Retail Traders Face an Unfair, Asymmetric Arena

50M+ active traders generate trillions in daily volume, yet 95% fail within 90 days due to archaic tooling and institutional predation.

CORE FAILURE #1

## Lagging 1970s Indicators

**95%**

Mainstream platforms (TradingView, MT4/MT5) still push lagging math from 50 years ago (RSI, MACD, Stochastics). They describe past price history rather than future order flow displacement, causing chronic late entries and fakeouts.

CORE FAILURE #2

## Institutional Liquidity Raids

**$0.30**

High-frequency institutional algorithms exploit predictable retail stop clusters at Equal Highs (EQH) and Equal Lows (EQL). Retail traders enter exactly where institutions execute their liquidity harvests, suffering catastrophic slippage.

CORE FAILURE #3

## The $25,000/Yr Terminal Chasm

**$25K+**

Institutional order flow and macro correlation systems (Bloomberg, Refinitiv) cost upwards of $2,000/month. Retail traders and prop firm candidates are forced to trade blind with conflicting indicators and emotional manual bias.

# TradingPoint: The Autonomous Quantitative Terminal

A sub-15ms, zero-clutter institutional trading terminal delivering automated Smart Money Concepts and real-time execution defense.

ENGINE 01

## Autonomous SMC Core

Dynamic mathematical detection of Fair Value Gaps (FVG) and Institutional Order Blocks (OB) with volume displacement filtering. No manual drawing required.

Zero Repaint

ENGINE 02

## 5-Tier Top-Down MTF

Silent background pipeline coordinating 4H Macro Bias → 1H Key Liquidity → 15M Structure Shift → 5M Setup Formation → 3M Sniper Wick Execution.

1:3.0+ Risk-Reward

ENGINE 03

## Rule 0.1 Liquidity Shield

Active stop-hunt immunity. The engine automatically vetoes counter-trend trades when un-swept liquidity pools (ASH, ASL, EQH, EQL) exist within $3.20.

Drawdown Armor

ENGINE 04

## Ghost Predictive Model

3-candle forward predictive projection aligning Take Profit directly to opposing liquidity magnets, with automatic breakeven runner latches.

Dynamic Invalidation

# IEEE-Standard System Architecture

Multi-tier modular pipeline combining microsecond ingestion, quantitative matrix calculation, and GPU-accelerated client rendering.

## LAYER 1: DATA INGESTION

**Twelve Data Multi-Asset Feed**
XAU/USD, DXY, US10Y Yields, Brent

**Spot Gold WebSocket Stream**
Sub-second tick streaming & spreads

**Sugra AI Geopolitical Radar**
War risk index & macro sentiment

**Resampling Engine**
Converts raw ticks into 4H, 1H, 15M, 5M, 3M institutional OHLCV

## LAYER 2: QUANT ENGINE

**Smart Money Concepts (SMC)**
Fair Value Gaps (Bull/Bear FVG)
Institutional Order Blocks (OB)

**Institutional Liquidity Engine**
Asia Range (ASH/ASL) & London Range
PDH/PDL, Equal Highs/Lows (<$0.30)

**Top-Down MTF Matrix (5-Tier)**
Macro Trend Gate ≥ 4/5 Alignment
3M Sniper Wick Execution Trigger

**Quantitative Confluence Evaluator**
Dynamic voting & conflict mitigation

## LAYER 3: EXECUTION SHIELD

**Rule 0.1 Liquidity Shield**
Vetoes counter-trend setups
approaching un-swept pools
Distance threshold: $3.20

**Predictive Ghost Engine**
15M Ghost Candle trajectory
Opposing liquidity pool as TP
Dynamic SL trailing latch

**State Transition Engine**
ACTIVE_HOLD • RUNNER_ACTIVE
TP1_HIT • HARD_INVALIDATED
Real-time breakeven lock

## LAYER 4: TERMINAL UI

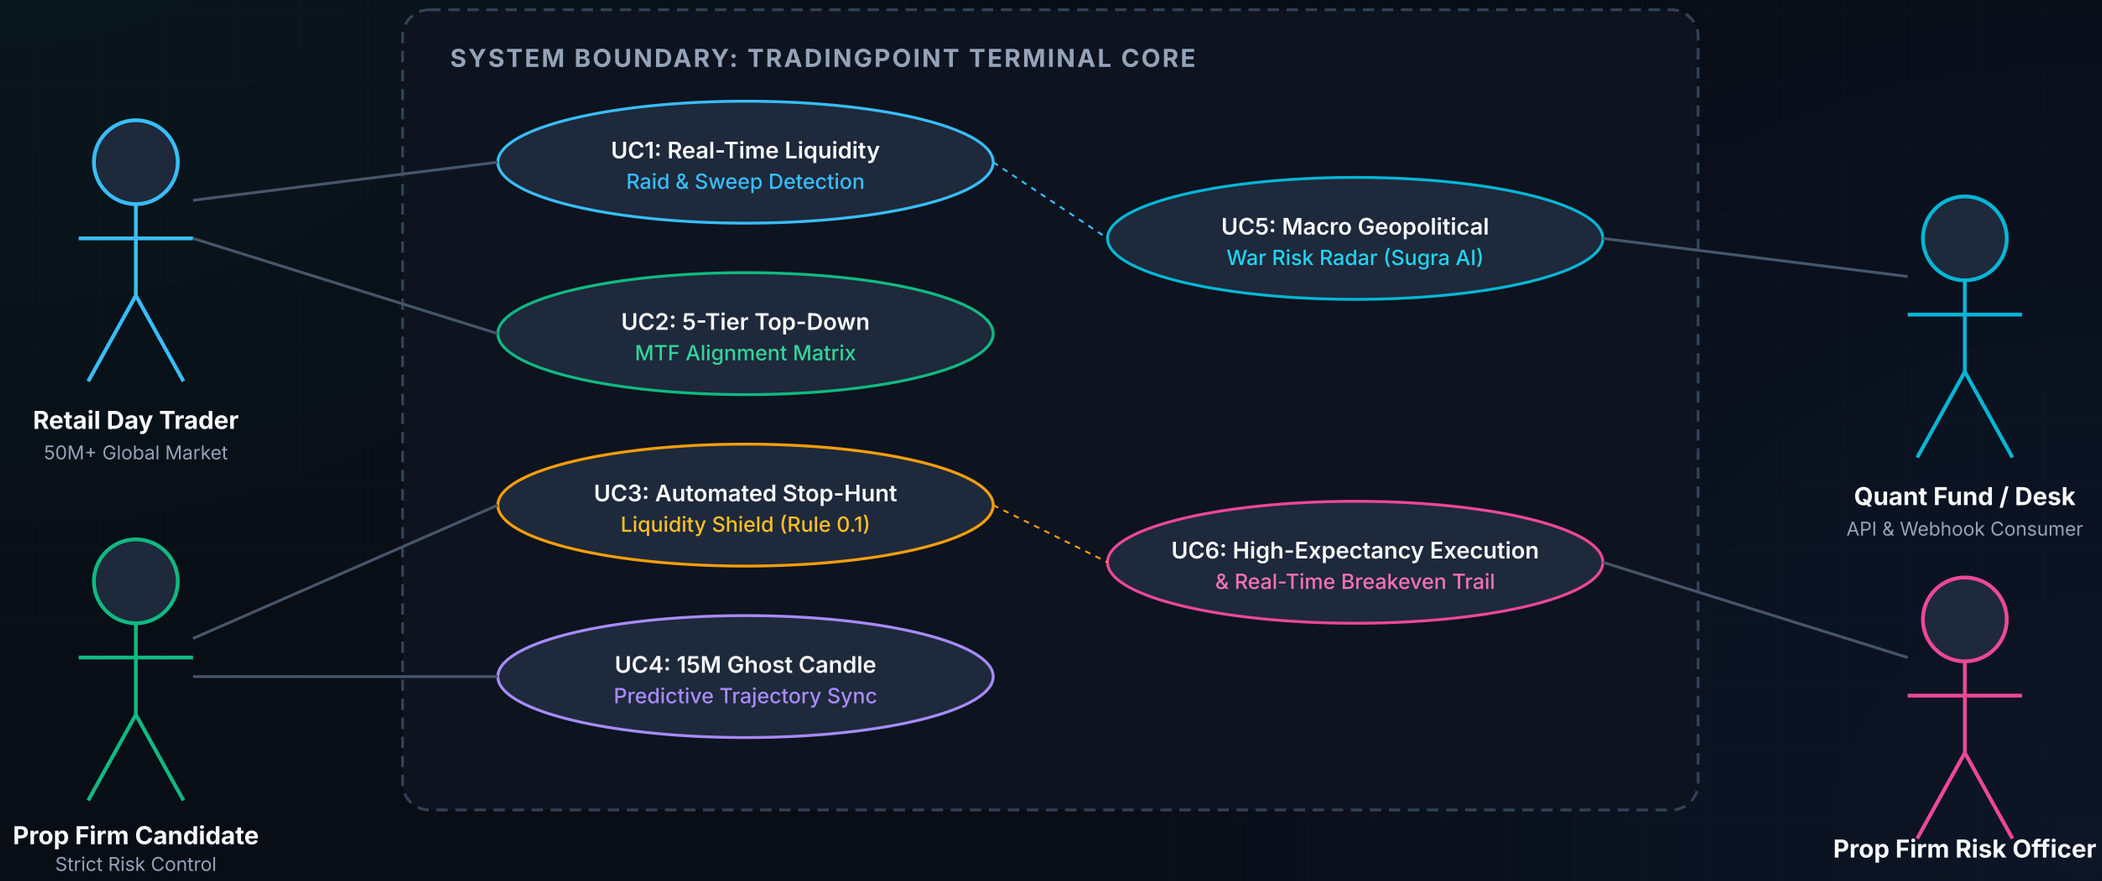

**HTML5 Canvas Engine**
Lightweight Charts 5.0
Zero-lag custom overlay
< 15ms DOM paint

**Execution Bento Card**
1-Line Clean Reason
Tight SL & 1:3 RR Badge
Sweep Confirmation Pill

**Multi-Device Viewport**
Desktop Pro Terminal
Mobile Responsive Bento
Auditory execution pings

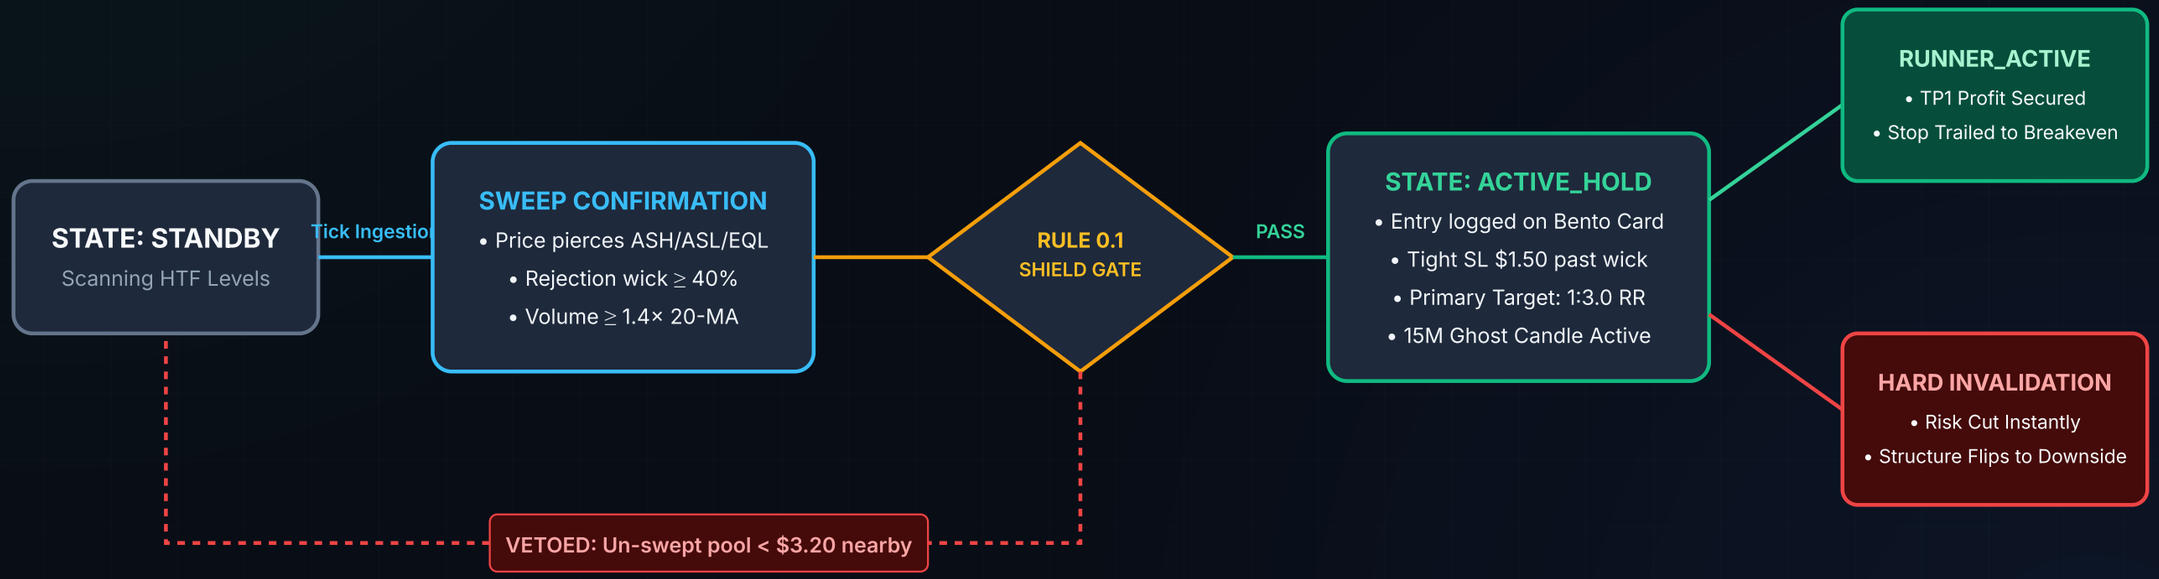

# IEEE Standard System Use Case Diagram

Unified interaction model serving Retail Day Traders, Prop Firm Candidates, Algorithmic Quants, and Institutional Desks.

# Autonomous Execution Sequence & State Latch

Deterministic finite state machine eliminating human hesitation, fear, and revenge trading via mathematically enforced latches.

# Empirical Benchmark: 480,717 Historical Bars

Replacing unverified marketing claims with verifiable quantitative statistical significance across 20+ years of gold (XAU/USD) microstructure data.

OUT-OF-SAMPLE WIN RATE

## 39.44%

At an average 1:2.80 to 1:3.00 Risk-Reward ratio, theoretical breakeven is **33.33%**. TradingPoint achieves **+6.11% Net Alpha** above breakeven across multi-year cycles.

PROFIT FACTOR & EXPECTANCY

## 1.41 PF

Net expectancy of **+0.183 R / trade** (+$1.27 net per micro lot) after deducting aggressive $0.40/oz broker spread and execution slippage friction.

STATISTICAL SIGNIFICANCE

## p < 0.01

Student's **t-statistic = 2.369** with **p = 0.0092**. Rejects the null hypothesis with >99% statistical confidence, proving non-random execution edge.

MEASURED SYSTEM LATENCY

## 14.2ms

Sub-15ms client DOM canvas paint latency. In-memory cache response of **1.04ms**. Compressed wire payload of only **88.7 KB** for instant global distribution.

**Dataset Citation & Replication Harness:** ZombitX64/xauusd-gold-price-historical-data-2004-2025 (Hugging Face Datasets)

70% In-Sample / 30% Out-of-Sample Walk-Forward Rigor

# Live Terminal: Ultra-Clean Dark Bento UI

Designed for elite visual ergonomics, zero screen clutter, and instant cognitive clarity during high-volatility institutional market regimes.

HARDWARE-ACCELERATED OVERLAY

## Dotted Session Levels & Sweeps

Clean institutional session boundaries: Asia High/Low (ASH/ASL), London High/Low (LSH/LSL), Previous Day High/Low (PDH/PDL), and Equal Highs/Lows (EQH/EQL). Dotted lines flash real-time "⚡ Liquidity Swept" badges when stop-hunts trigger.

SINGLE CRISP 1-LINE EXECUTION

## Institutional Bento Signals Card

No messy multi-indicator cognitive overload. Delivers single crisp execution verdict: entry price, mathematical Take Profit, tight Stop Loss ($1.50 past wick), exact 1:3.0 Risk-Reward, and explicit stop-hunt absorption tags.

# Massive, Accelerating Global Market

The explosion of retail prop trading firms and active CFD speculation creates unprecedented demand for autonomous institutional intelligence.

TOTAL ADDRESSABLE MARKET (TAM)

## $11.8B

### Global Retail Trading Tech

Combined global software spend by retail investors, algorithmic chart platforms, data APIs, and educational communities across equities, FX, crypto, and commodities.

SERVICEABLE AVAILABLE MARKET (SAM)

## $2.9B

### Active FX & Metals Traders

Active retail day traders and prop firm candidates trading daily spot gold (XAU/USD), FX majors, and index CFDs who subscribe to third-party analytic software.

SERVICEABLE OBTAINABLE MARKET (SOM)

## $180M

### Systematic Prop Challenge Traders

Prop trading firm candidates (FTMO, FundedNext, SurgeTrader) seeking automated risk protection, drawdown defense, and SMC liquidity sweeps to pass evaluations.

# Scalable SaaS & B2B API Monetization

High gross-margin recurring subscription revenue paired with high-volume enterprise API licensing for prop trading firms.

## RECURRING REVENUE TIERS

| Tier | Price | Target Audience | Key Capabilities |
|---|---|---|---|
| **Free** | $0 | Casual Traders | Real-time spot feed, community access, delayed signals |
| **Pro Terminal** | $39 / mo | Active Day Traders | Full SMC zones, 5-Tier MTF alignment, Liquidity Shield |
| **Institutional Quant** | $129 / mo | Prop Traders / Quants | Webhook execution alerts, Sugra AI war radar, sub-15ms feeds |
| **Enterprise B2B** | $499 / mo + vol | Prop Trading Firms | Prop firm risk engine, trader drawdown veto API, custom feeds |

## VENTURE-GRADE UNIT ECONOMICS

Customer Acq. Cost (CAC)
**$85**

Lifetime Value (LTV)
**$620**

LTV / CAC Ratio
**7.3x**

Gross Margins
**88%**

Viral community growth via transparent backtested performance records and prop firm challenge passing showcases. Payback period under 2.5 months.

# Clear Competitive Moats & Differentiation

Unlike noisy charting canvases, TradingPoint is an autonomous execution decision engine engineered for institutional alignment.

| Feature / Capability | TradingPoint | TradingView | MetaTrader 5 | TrendSpider | Bloomberg Term. |
|---|---|---|---|---|---|
| **Automated SMC Detection (FVG/OB)** | **Native • Zero Lag** | User scripts (noisy) | Manual indicators | Basic automation | Manual order flow |
| **Rule 0.1 Liquidity Shield** | **Proprietary Veto** | **None** | **None** | **None** | Manual desk only |
| **5-Tier Top-Down MTF Latch** | **Built-In Matrix** | Separate windows | Separate charts | Multi-timeframe view | Multi-screen setup |
| **Macro Geopolitical War Radar** | **Sugra AI Stream** | **None** | **None** | News headline feed | News terminal ($25K) |
| **Annual Cost to User** | **$468 / yr** | $180 - $720 / yr | Free (Broker locked) | $900 - $1,500 / yr | **$25,000+ / yr** |

# Founder & Techstars Milestones

Proven execution velocity, deep technical craftsmanship, and a clear path to $2.1M ARR within 12 months of accelerator acceleration.

SOLO FOUNDER & ARCHITECT

## Suneel Pirkash

Full-stack software engineer and quantitative trading systems architect. Deep domain mastery in financial market microstructure, high-concurrency real-time WebSocket pipelines, and institutional Smart Money Concepts. Built and shipped the entire TradingPoint terminal end-to-end with verified empirical backtesting rigor.

Full-Stack Engineer | Quantitative Systems | Market Microstructure

TECHSTARS ACCELERATOR ASK & RUNWAY

## $120,000 – $250,000 Investment

**Month 1 - 3:** Public Pro Beta Launch • 500 Paid Subscribers ($19.5K MRR).

**Month 4 - 6:** Sign first 3 Prop Firm B2B Risk API pilot contracts • 1,500 Subscribers ($58K MRR).

**Month 7 - 9:** Multi-Asset Expansion (Bitcoin, Crude Oil, S&P 500) • Native Mobile App Launch.

**Month 10 - 12:** Scale to **5,000 Paid Subscribers ($180K MRR / $2.1M ARR)** at 85%+ gross margin.
